

As a member of the Circular Economy for Flexible Packaging (CEFLEX) initiative, we (Korozo Group) are collaborating with the value chain to remove waste and increase recovery and reuse of plastics.

We are already committed to creating a sustainable and circular future for all. Through our innovative processes, fully recyclable solutions, and partnerships with brands and retailers, we are already demonstrating the power of circular flexible packaging.

CEFLEX is a collaboration of European companies, associations, and organisations representing the entire value chain of flexible packaging, working together to make all flexible packaging in Europe circular.

Working together with all stakeholders in the flexible packaging value chain is an important step in furthering this goal.

This aligns with our own sustainability initiatives and complements the work we are doing with local and global partners to maximise recycling and optimise reuse.

We look forward to creating a circular economy for flexible packaging in partnership with the entire value chain.
